Contents of volume 51, 2002

Part 1

A hierarchical modelling approach to analysing longitudinal data with drop-out and non-compliance, with application to an equivalence trial in paediatric acquired immune deficiency syndrome *J. W. Hogan and M. J. Daniels* 1

The Bayesian choice of crop variety and fertilizer dose *C. M. Theobald and M. Talbot* 23

Building marginal models for multiple ordinal measurements *G.-H. Huang, K. Bandeen-Roche and G. S. Rubin* 37

Sample reuse simulation in optimal design for T_{max} in pharmacokinetic experiments *J. Wang* 59

Latent class models for longitudinal studies of the elderly with data missing at random *B. A. Reboussin, M. E. Miller, K. K. Lohman and T. R. Ten Have* 69

A generalized estimating equation approach to modelling incompatible data formats with covariate measurement error: application to human immunodeficiency virus immune markers *J. Kowalski and X. M. Tu* 91

Effect modification in a randomized trial under non-ignorable non-compliance: an application to the alpha-tocopherol beta-carotene study *P. Korhonen and J. Palmgren* 115

Part 2

Bayesian cure rate models for malignant melanoma: a case-study of Eastern Cooperative Oncology Group trial E1690 *M.-H. Chen, D. P. Harrington and J. G. Ibrahim* 135

Application of Markov chain Monte Carlo methods to projecting cancer incidence and mortality *I. Bray* 151

Nonparametric measures of association between a spatial point process and a random set, with geological applications *R. Foxall and A. Baddeley* 165

Nonparametric calibration for age estimation *D. Lucy, R. G. Aykroyd and A. M. Pollard* 183

Markov chain Monte Carlo inference applied to a complex model for the longitudinal analysis of breast patterns *J. P. Myles, S. W. Duffy, T. C. Prevost, N. E. Day, M. Hakama and T. Salminen* 197

Maximum *a posteriori* estimation of image boundaries by dynamic programming *C. A. Glasbey and M. J. Young* 209

Anisotropic spatial sampling designs for urban pollution *G. Arbia and G. Lafratta* 223

Correcting for non-compliance bias in case–control studies to evaluate cancer screening programmes *S. W. Duffy, J. Cuzick, L. Tabar, B. Vitak, T. H.-H. Chen, M.-F. Yen and R. A. Smith* 235

Modelling subjective use of an ordinal response scale in a many period crossover experiment *R. Wolfe and D. Firth* 245

Part 3

Bayesian modelling of catch in a north-west Atlantic fishery *C. Fernández, E. Ley and M. F. J. Steel* 257

Maximum likelihood estimation of bivariate logistic models for incomplete responses with indicators of ignorable and non-ignorable missingness *N. J. Horton and G. M. Fitzmaurice* 281

Missing time-dependent covariates in human immunodeficiency virus dynamic models *L. Wu and H. Wu* 297

Analysing partial ranks by using smoothed paired comparison methods: an investigation of value orientation in Europe *B. Francis, R. Dittrich, R. Hatzinger and R. Penn* 319

Data analytic methods for latent partially ordered classification models *C. Tatsuoka* 337

Modelling daily multivariate pollutant data at multiple sites *G. Shaddick and J. Wakefield* 351

Corrigendum: Spatial variation in risk of disease: a nonparametric binary regression approach *J. E. Kelsall and P. J. Diggle* 373

Part 4

Biplots of compositional data *J. Aitchison and M. Greenacre* 375
Denoising radiocommunications signals by using iterative wavelet shrinkage *P. D. Baxter and G. J. G. Upton* 393
A mixture model to assess the effect of hormonal stimulation on the development of follicles in prepubertal heifers *P. Lambert* 405
A parametric dynamic survival model applied to breast cancer survival times *K. Hemming and J. E. H. Shaw* 421
A compound Poisson model for word occurrences in DNA sequences *S. Robin* 437
Dynamic generalized linear models with application to environmental epidemiology *M. Chiogna and C. Gaetan* 453
Generalized local influence with applications to fish stock cohort analysis *N. G. Cadigan and P. J. Farrell* 469
Minimum distance estimation of the distribution functions of stochastically ordered random variables *R. E. Gangnon and W. N. King* 485
Childhood malaria in the Gambia: a case-study in model-based geostatistics *P. Diggle, R. Moyeed, B. Rowlingson and M. Thomson* 493
